ARABELLA D. PABULAR

Data Analyst | Power BI, SQL, Excel & Google Sheets | Dashboards & Reports

Negros Occidental, Philippines (UTC+8) | +63 920 716 2201 | pabulararabella@gmail.com

Portfolio: aetherbella.github.io | linkedin.com/in/arabella-pabular-204942289

Tableau: public.tableau.com/app/profile/arabella.pabular

PROFESSIONAL SUMMARY

Data Analyst with a Bachelor of Science in Information Technology (Data Analytics major) and hands-on experience cleaning, consolidating, and reporting on healthcare and education data. Built a facility's first emergency room dashboard from 3,300+ records, a Power BI dashboard analyzing board-exam passing rates for an education company, and weekly stakeholder reports. Works with SQL (MySQL), Excel, Google Sheets, and Python (pandas, scikit-learn) for data preparation and validation, and with Power BI, Tableau, Looker Studio, and Google Apps Script web apps for dashboards. Turns scattered, inconsistent data into clean datasets and reports teams can act on.

TECHNICAL SKILLS

Data Analysis & Querying: SQL (MySQL Workbench), Python (pandas, NumPy, scikit-learn, SciPy), Microsoft Excel, Google Sheets, Google Apps Script, Microsoft Access, Jupyter Notebook

Business Intelligence & Visualization: Power BI, Tableau, Looker Studio, Apps Script Web App Dashboards, Matplotlib, Seaborn, Dashboard Design, KPI Tracking

Data Preparation & Quality: Power Query, Data Cleaning, Data Transformation, Data Validation, Duplicate & Missing-Value Handling, Outlier Detection (IQR)

Analytics & Reporting: Trend Analysis, Root Cause Analysis, Exploratory Data Analysis, Statistical Analysis, Customer Segmentation (K-Means, Hierarchical Clustering), Predictive Modeling, Stakeholder Reporting

EXPERIENCE

Data Analyst (Volunteer)

La Castellana Primary Care Facility | May 2026 – Aug 2026

- Consolidated and cleaned 3,300+ emergency room records from raw intake and treatment data in Google Sheets, creating a single dataset ready for analysis and reporting
- Built the facility's first interactive ER dashboard to track patient volume, wait times, and case outcomes, where previously only raw records existed
- Developed a mortality rate dashboard in Google Sheets to monitor facility trends over time, giving staff a data-based view for clinical and operational review that the facility did not have before

Data Analyst Intern

Kippap Learning Corporation | Jan 2026 – Apr 2026

- Cleaned and analyzed LMS and assessment data for 500+ students using SQL (MySQL Workbench) and Excel/CSV files
- Built a Student Performance / Passing Rate Analysis Dashboard in Power BI that ranks board-exam passing rates by study technique and device, with filters for working status, age, and first-time takers
- Developed 2 Power BI dashboards in total, covering student engagement, passing rates, and performance trends
- Identified and resolved data quality issues across 10+ datasets, improving the accuracy and consistency of reporting
- Delivered weekly Power BI reports and data insights to instructors and stakeholders
- Built a customer support tracker in Google Sheets with real-time KPIs for 60+ cases per month, tracking case volume, inquiry and issue rates, resolution time, and root causes by category, channel, and weekday

PROJECTS

Student Churn Prediction
Data Analytics Capstone | Jan 2025 – Nov 2025

- **Objective:** Flag at-risk students early by combining academic, payment, and sentiment data that previously sat in separate sources
- **Tools:** Microsoft Access, Python, Power BI
- **Solution:** Integrated the data in Access; compared Logistic Regression, Random Forest, and HistGradientBoosting with student-grouped 5-fold cross-validation; deployed Logistic Regression for interpretability in a Power BI dashboard filtering risk by term, program, and category
- **Result:** Logistic Regression: 93.99% accuracy, 0.9053 F1, 0.9757 ROC-AUC (cross-validated); UAT: 100% refresh success, pilot users rated it 88.6% and 91.4% (target 80%)

Campaign Performance Analytics Dashboard
Portfolio Project, Kaggle Dataset | Oct 2026

- **Objective:** Track campaign performance, audience behavior, and profitability in one shareable dashboard
- **Tools:** Google Sheets, Google Apps Script, deployed as a web app
- **Solution:** Connected a 10,000-record, 41-column digital advertising campaign dataset (Kaggle) in Google Sheets to a custom web dashboard with KPI cards (profit, margin, ROAS), filters by platform, objective, industry, device type, target gender, budget tier, and year/quarter/month, and separate pages for campaign performance, audience, creative analysis, and insights
- **Result:** A browser-based dashboard that refreshes from the source sheet, so users can filter and review campaign results without working in the spreadsheet

Customer Data Cleaning & Segmentation (FinMark)
Coursework | Practice Dataset

- **Objective:** Prepare three linked datasets (customers, products, transactions) and identify customer segments
- **Tools:** Python (pandas, NumPy, Matplotlib, Seaborn, scikit-learn, SciPy), Jupyter Notebook
- **Solution:** Checked and handled missing values, removed duplicates, flagged outliers with the IQR method, tested distributions (Shapiro-Wilk), converted data types, and scaled features; segmented customers with K-Means and compared against hierarchical clustering
- **Result:** Three customer segments by transaction amount and satisfaction score, with recommendations for each

Additional Dashboards

- **MotorPH Sales & Inventory:** revenue, units sold, average transaction value, monthly and category sales, and best- and worst-performing products (practice dataset, Q3 2022 data)
- **Smart Environmental Monitoring:** multi-tab Tableau Public dashboard for air quality, water quality, and climate data, with alert-zone thresholds for readings outside safe ranges

EDUCATION

Bachelor of Science in Information Technology, Major in Data Analytics — Summa Cum Laude
Mapúa Malayan Digital College | Aug 2022 – Aug 2026

Relevant Coursework: Database Principles & Design (ERD, DFD, Data Dictionary), Exploratory Data Analysis, Data Cleaning & Manipulation, Statistical Analysis, Data Mining, Machine Learning & Predictive Analytics, Dashboard Development (Tableau, Power BI, Looker Studio)

CERTIFICATIONS

- Data Science Essentials with Python — Cisco Networking Academy (Oct 2026)
- Introduction to Data Science — Cisco (Sep 2026)
- Jupyter Notebook Basics — Anaconda (Sep 2026)
- ChatGPT for Project Management — Coursera (Mar 2026)
- Introduction to Project Management with ClickUp — Coursera (Mar 2026)
- Time Management for Personal & Professional Productivity — Coursera (Mar 2026)
